

Camera Link® PCIe x1 Card for Desktop PCs

VCE-CLPCIe01

Simultaneous acquisition from two Base Camera Link cameras or one Medium Camera Link camera. Uses intelligent DMA for fast, efficient use of the ExpressCard bandwidth with a flow-through pipelined architecture for low latency.

IMPERX FrameLink PCIe x1 is a professional level video capture card that enables users to view and store in real time mega pixel video images from Camera Link sources onto desktop computers. IMPERX FrameLink PCIe x1 is capable of capturing single or multiple frames and standard AVI clips on up to two Base or one Medium CameraLink compliant video source. Each captured frame can be stamped with a user message along with the date and time of capture. A full software suite that includes drivers, C/C++, SDK, and an application program is provided with each FrameLink VCE-CLPCIe01 card.
